Image Studio Software 5.x.x Installation Instructions

Mac OS X 10.9, 10.10, 10.11, or 10.12:

Installing via CD

1) Place installation CD into drive.

2) If installation does not start immediately, browse to the CD and double-click the installer file.

3) Click **Agree** to accept the license agreement.

4) To install, drag the Image Studio™ Software icon into the Applications folder (below).

Installing via download

1) Go to your Mac® System Preferences and click **Security & Privacy** to open the Security & Privacy window.

2) Click the lock in the bottom left corner of the window to allow editing, if necessary.

3) Under the **General** tab, click **Mac App Store and identified developers** under the **Allow applications downloaded from** option.

4) Download, and double-click the installer file on your computer.

5) Click **Agree** to accept the license agreement.

6) To install, drag the Image Studio™ Software icon into the Applications folder.

7) Open the Image Studio Application by double-clicking the Image Studio™ Software icon.

8) If a window appears that says "ImageStudio.app is an application downloaded from the internet. Are you sure you want to open it?" click **Open**.

Windows® 7, 8, 8.1, or 10 Operating Systems:

> ***Note:*** *The installer must have administrator privileges on the computer to install Image Studio™ Software 5.x.x. Log on to the computer as an Administrator, or log on as a user who has administrative permissions. Computer requirements: Minimum 4 GB of RAM and Windows 7, 8, 8.1, or 10 Operating System.*

Installing via CD

1) Place installation CD into drive.

2) If installation does not start immediately, browse to the CD and double-click on Win_ Image Studio Full_5.x.x.exe.

3) Click **Next** and follow the instructions in the Setup Wizard.

Installing via download

1) Download and double-click the Win_Image Studio Full_5.x.x.exe file on your computer.

2) Click **Next** and follow the instructions in the Setup Wizard.

Image Studio Software Setup Wizard:

1) Open Win Image Studio Installer 5.x.x on your computer.

2) Follow instructions in the Setup Wizard.

> ***Note:*** *After the Image Studio installation process is completed, installation of the communication program (mDNSResponder) will begin automatically. If upgrading from a previous version of Image Studio, this installation may not be needed.*

3) Please refer to instructions included with your additional application keys, if applicable, for
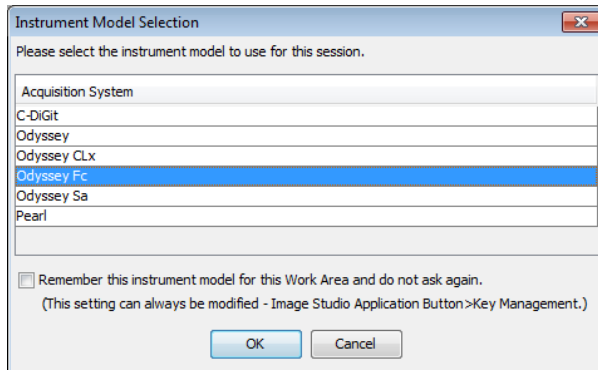

new installations.

Note: *If you are upgrading from a previous version of Image Studio™ Software on a Mac, you will need to reinstall additional application keys.*

Connect to the Instrument:

The first time you connect:

1) Power the Odyssey Fc Imager on and wait several minutes to allow the instrument to establish a network address.

2) Start Image Studio™ Software. Instruments will be detected automatically.

3) The **Instrument Model Selection** dialog will open. Select Odyssey Fc and click **OK**.

   Image Studio™ Software will open your **Work Area** and search for the Odyssey Fc Imager.

Note: *You can save this as your default instrument for the current Work Area by checking 'Remember this instrument model for this Work Area and do not ask again' box.*

4) If the software discovers multiple instruments, it will prompt you to select the instrument to be used. Select the Serial Number of the desired instrument, and click **OK**.

Note: *If you experience connection problems, a connection diagnostic will launch to help you diagnose the problem.*
